

Password Generator - README

This is a Password Generator web application designed to create secure and customizable passwords. It features a modern UI and offers options to include numbers and special characters for enhanced security.

Features:

- Customizable password length (6-30 characters).
- Option to include numbers and special symbols.
- Generates a random and strong password.
- Estimates time required to hack the password.
- Responsive and modern user interface.

How It Works:

1. Enter the desired password length.
2. Check the boxes to include numbers and symbols.
3. Click 'Generate Password' to create a secure password.
4. View the estimated hack time for security analysis.
